

IDEAL COMMERCIAL INTERIORS

Helping our clients to look the way they want their team and customers to feel

“As we were comparing various products and pricing for our new space in Renaissance Square it was obvious that the ALUR Walls and MAI products were superior and reasonable from a pricing perspective. Due to your pricing structure and the time you took to explain the unique features of the products, choosing Ideal Commercial Interiors was an easy decision to make. We were pleased with the ease of installation of the ALUR Wall System and MAI products and were equally impressed with the attention to detail, quality and follow up of your installation team!”

Gina Dingman, CCIM
President, Everest Real Estate Advisors

Everest Real Estate Advisors

Looking to start their new venture, Everest Real Estate Advisors (EREA) decided it was time to look for office space in Downtown Minneapolis. They eventually chose a suite in the Renaissance Square, an 100+ year old building in the heart of downtown. While moving into a historical building has its benefits, they realized that the floor was uneven by almost one inch in some places. Thankfully, the ALUR Wall System that Gina and her team decided on was able to compensate for unlevelled floors up to 1 1/2 inch. Due to the constricted size of the office space the challenge was creating private offices while maintaining an open office environment. Our solution to this problem was the use of glass fronts with sliding doors and wall mounted modular furniture resulting in more usable office space and enhanced utilization of natural lighting. Ideal Commercial Interiors provided EREA with filing, walls, freestanding furniture and seating to create an all-in solution from a single manufacturer. This resulted in competitive pricing on the entire project. The project was completed on budget and without any major issues and EREA were pleased with the final product.
